26 of 60. Which two are true about CloudHub? (Choose two.)

Choose 2 answers

- A. ☐ CloudHub workers can be configured into Hazelcast clusters
- B. ☒ CloudHub applications cannot use a custom domain
- C. ☒ Some CloudHub deployable archives can be directly deployed to on-prem Mule runtimes
- D. ☐ CloudHub applications run sandboxed and cannot connect to external systems

Congratulations! You are now a MuleSoft Certified Architect - Solution Design Specialist. You will receive an email from MuleSoft within the next few hours that contains information to obtain an exam certificate and links to share your success with your LinkedIn professional network. (If you do not receive this email, please contact certification@mulesoft.com.)

We invite you to join our Champions program at <https://developer.mulesoft.com/champions>, where you can keep learning thanks to technical challenges, blog posts, and quizzes, all while networking with your peers and top MuleSoft Experts. Plus, by filling out your new certification information in the program (in the "Training and Certifications" area), you can earn points to redeem a MuleSoft Certified T-shirt in the reward store! **Make sure you use the same email address to register with the Champions program as you used to sign up for your exam!**

Join now at <https://developer.mulesoft.com/champions>.
